Santa Fe Public Schools
District Portfolio

A comprehensive view of demographics and student performance based on longitudinal data.

2011-2012

Based on 2010-2011 data

Produced by:
SANTA FE PUBLIC SCHOOLS
Office of the Deputy Superintendent
Department of Assessment and Accountability

Demographic Data
District

Santa Fe Public Schools consists of 20 elementary schools, 3 middle schools, and 3 high schools. Taken from student enrollment on a 40-day count, the trend for four years has been a consistent decline of students, until the increase in enrollment in 2008-2009. There were 12,442 students enrolled in the district on the 40th day of the school year 2008-2009. This was an increase of 140 students from the previous year in which there were 12,302 students enrolled in the district on the 40th day of school year 2007-2008. This is a decrease of 122 students from a total school population of 12,424 for the 2006-2007 school year. There were 12,424 students enrolled in the district on the 40th day of the 2006-2007 school year. This is a decrease of 205 students from a total school population of 12,629 for the 2005-2006 school year. The data provided on the next few pages provide an overview of the 40-day count by federally mandated group and subgroups. Using these data, one can follow increasing and decreasing trends in school enrollment. The enrollment for the past four years is charted below:

Standards-Based

Criterion Referenced Student

Performance Data

Standards-Based, Criterion-Referenced Student Performance Data

Data from Measured Progress are used to generate the reports that follow. Therefore, the data reflect student performance on totally completed tests. A distinction must be made between the data that NMPED uses to "designate" schools and the data used in these reports. NMPED uses all data from all assessments regardless of percentage of completion. To obtain an accurate picture of student performance with regard to knowledge of New Mexico Standards with Benchmarks, data used in these reports is for assessments that are totally completed.

Please note that several caveats are placed on the following reports so that the reader receives a picture of student-based teaching and learning.

1. **Only totally completed assessments were used in calculating the percentage proficient.**
2. **While there is a relationship between the "NMPED NCLB Designation" and the district-generated data, the reports that follow provide a deeper look at the percent of students mastering New Mexico Content Standards with Benchmarks and Performance Objectives.**
3. **The data in all of the reports that follow are calculated for all groups and subgroups with regard to size and the tables will note the acceptable size for subgroups.**

Understanding the Use and Implications of CRT Data:

The data presented on the pages that follow reflect student performance with regard to the New Mexico Standards with Benchmarks. Schools should use these data in two ways.

- First, the data can be used to determine how well students performed with regard to New Mexico Standards with Benchmarks in a given year as reflected on the report. Because these data are obtained from one year and reported and used in the next, these data provide valuable information about what students know and are able to do at the beginning of the next school year.

- Secondly, these data provide a longitudinal view with regard to student performance within the schools so that teachers can discuss professional practice and instructional delivery.

Standards-Based Assessment (SBA)
Criterion-Referenced
Student Performance Data
Percent Proficient by Grade by Subject, by Group
(Must have 10 or more in a group for data to be reported)
English Assessment Results

In the spring of 2011 the Public Education Department began grading all Standards Based Assessments using a vertical aligned scale. A bridge study was release by PED in July of 2011. The study results below compares the two scales. The white column is based on the old scale scores and the black column is based on the new vertically aligned scale. The 11-12 old scale (white column) is an approximation due to the new scale being based on 80 points and the old scale based on 999 points.

*** Elimination of "honors" classes (since 2004/05, SFHS has offered only pre-AP and AP courses; no pre-AP in 11th or 12th grades)**
 # Traditional 6-period day (60-minute periods)

Please note that prior to 2006/07 school year, AP classes were primarily taught year-long, 90 minutes/day. There were some exceptions…for example, to give students an opportunity to take more AP classes on the 4 X 4 schedule, we decided to break the first period block into two blocks, 1A and 1B, with each block 55 minutes in length – students and teachers actually began block 1A a half hour before the regularly scheduled first period to accommodate for this change.
